

NOTICE

Internship - Karkinos Healthcare Pvt Ltd

Karkinos Healthcare is an end-to-end technology-driven oncology-focused managed healthcare platform that provides world-class cancer care closer to one's home. They are on a mission to provide an end-to-end cancer care solution where no person is deprived of care, for lack of access or affordability. The firm is backed by Tata Group, Reliance Industries Limited, Mayo Clinic US, Rakuten Medical, Endiya partners, Hero Enterprise, and other eminent investors.

Karkinos Healthcare are looking to hire Interns (Diagnostics) who will be working closely with select hospitals in the city.

Job : Diagnostic Interns

Duration : 3 months (full time)

Key Responsibilities:

- Conduct comprehensive field market research within assigned hospital(s) to identify the current diagnostic landscape, including existing testing methodologies, technologies, and competitors.
- Assess the current utilization of molecular testing and other diagnostic services at the hospital and identify opportunities.
- Develop strategic recommendations and plans to position our molecular testing and diagnostic services effectively within the hospital, considering the specific needs of healthcare providers and patients.
- Collaborate with hospital stakeholders, including physicians, oncologists, pathologists, and administrators, to understand their perspectives, gather feedback, and address any concerns or barriers to adoption.
- Analyze and interpret data related to the impact of molecular testing and diagnostic services on patient outcomes and hospital performance.
- Prepare reports and presentations summarizing research findings, market analysis, and proposed strategies to be presented to internal teams and hospital stakeholders.
- Stay updated with advancements in the field of cancer diagnostics, including new testing technologies, regulatory guidelines, and industry trends.
- Assist in organizing and participating in educational events, workshops, and conferences to raise awareness and promote the value of our diagnostic services.
- Collaborate with cross-functional teams to ensure alignment of strategies and maximize the impact of diagnostic initiatives.

Skills required:

- Strong interest in the field of cancer diagnostics and a desire to contribute to improving patient outcomes.
- Excellent research and analytical skills, with the ability to gather and interpret data.

- Strong written and verbal communication skills, including the ability to prepare clear and concise reports and presentations.
- Ability to collaborate effectively with cross-functional teams and build relationships with healthcare professionals.
- Highly motivated, detail-oriented, and able to work independently with minimal supervision.
- Proficiency in Microsoft Office Suite (Word, Excel, PowerPoint).
- Flexibility to travel to assigned hospital(s).

Who can apply:

- Currently pursuing a Bachelor or Master degree in a relevant field (e.g., biology, Biotechnology, healthcare management, or a related discipline).

Benefits:

- Opportunity to work closely with experts across domains and learn
- Opportunity to work for a brand and an organisation of international repute funded by Tata Group, Reliance Industries, Rakuten Medical and Mayo Clinic
- Work for an organization that is re-imagining cancer care with innovative path breaking patient navigation systems

Stipend: INR 7500 per month
