Ref. No. ....

Dated ..24-11-2011.....

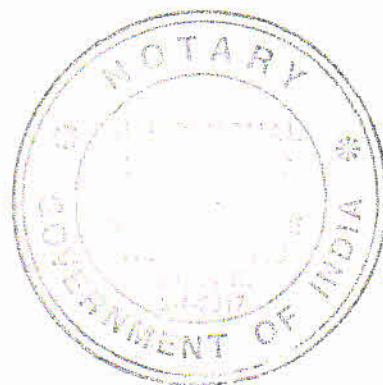

To whom it may concern

It gives me immense pleasure to write about Mr. Sandesh Chibber who has submitted his Ph.D thesis in November 2011 under my supervision. The title of his thesis was "Interaction of anti-cancer drugs with divalent metal Cu (II), an in-vitro study". Mr. Chibber is known to me since 2005 when he joined our department as a student of M.Sc Biochemistry. After completing his M.Sc with good grades, he joined for his Ph.D. he is a very hard working, devoted, obedient student, who shares a wonderful relationship with his peer group, who is more than ready to help others. He is able to plan and execute his work independently. He has done reasonably good work as part of Ph.D program and has been able to publish his work in good quality peer reviewed journals. This is also reflective of his good communication and writing skills.

He is a suitable candidate for any research or teaching position, where he would surely contribute positively. I strongly recommend him for any endeavour he chooses to pursue, and wish him success in his life. I would be glad to respond to queries about him.
